- To enable, balik niyo lang din ulet sa dati~

MS Office 365

http://www.mediafire.com/file/cxl9ttkuuk23tws/setupo365proplusretail.x64.en-us_.exe/file

(PILI LANG PO KAYO KUNG OFFICE 365 OR MS OFFICE 2019 BALAK NIYO I DOWNLOAD, WAG NA WAG NA PAGSABAYIN YUNG DALAWA HAHAHAHAHA)

Para po ma-activate yung Office 365 niyo

http://www.mediafire.com/file/igg8arws896co50/Activator.txt/file

(If may naka install na pong Office 365 sa PC/Laptop niyo by default, no need na pong idownload yung installer ng Office 365, download the activator na lang po and skip to Step # 5.)

1. Download po yung **2** link na nasa taas.

2. For installation procedures, **turn off po muna yung Windows Defender or any antivirus** niyo to avoid conflicts in installation and activation. To do this, scroll down lang through this email and **refer to**

Step # 2 sa instructions ko sa MS Office 2019.

3. Click niyo po yung installer ng Office 365 to begin installation. And wait for it to finish the procedure. (Medyo matagal po depending sa Internet Speed niyo)

4. Check niyo po kung gumagana and sign in gamit your MS Account or simply create a new one.

5. To activate your Office 365, punta po kayo sa activator which ang file name is **Activator.txt**

6. Click niyo po ito and magbubukas ang notepad na naglalaman ng kung ano-ano. Wag niyo po ito galawin HAHAHAHAHA.

7. Look on the Upper Left and click **File,** then click po yung **Save As** then name it as **activator.cmd**

8. Punta po kayo sa sinave niyong **activator.cmd** and **right click it and Run as Administrator**. Pa wait po yung message na **Product is Activated Succesfully** and close the activator.

9. Voila, activated na po yung Office 365 niyo!

Just in case na lumabas ay "Your Product Version is currently not supported" at hindi po na-activate yung Office 365 niyo, try niyo po ito.
